

Chlamydia CEL Pn IFA

The Cellabs Chlamydia CEL Pn IFA kit is an indirect immunofluorescence assay for the detection of *Chlamydia pneumoniae* organisms in patient specimens or in culture. It uses a monoclonal antibody specific for *C. pneumoniae*.

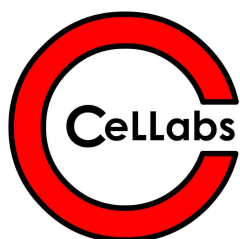

Superior clinical reliability

Direct observation of EB's, reticulate bodies or inclusions
Monoclonal antibody ensures specificity

Most reliable and affordable

- No culture required, direct observation
- Cost effective alternative to PCR methods
- Simple and rapid (1 hour)
